PROFESSIONAL SUMMARY

Results-driven Software Developer with a proven track record in delivering high-quality software solutions. Experienced in developing and implementing complex applications, optimizing processes, and mentoring cross-functional teams. Committed to continuous learning and contributing to organizational success through innovative technology solutions.

EDUCATION

Information Technology Project Management

(Sept 2023 - April 2025)

Algoma University, Ontario, Canada

Bachelor of Engineering (Computers)

(April 2010 - May 2015)

Mumbai University, Mumbai, India

SKILLS

- **Programming Languages:** Java, JavaScript, HTML, CSS, TypeScript, Finacle Scripting
- **Frameworks:** Spring Boot, Microservices, RESTful APIs, Angular, Node.js, Connect24
- **Databases:** Oracle, SQL, Enscribe
- **Version Control Systems:** GitHub, Bitbucket, TortoiseSVN
- **Operating Systems:** Unix (HP-UX & IBM AIX), Microsoft Windows
- **DevOps & CI/CD Tools:** Jenkins, Maven, SonarQube, Nexus & JFrog Artifactory
- **Core Banking Platforms:** Finacle, Base24, HP NonStop Tandem, ISO8583
- **Project Management Tools:** Agile Scrum Framework, Jira, Confluence
- **Monitoring Tools:** Prognosis, ESQ
- **Other Tools:** Oracle Golden Gate (GGS), Postman
- **Soft Skills:** Communication, Analytical Thinking, Problem-solving, Leadership

EXPERIENCE

Senior Consultant

Capgemini (client Digi-Bank Singapore)

(Jan 2021 - Aug 2023)

- Drive strategic planning and execution by collaborating with cross-functional Agile teams, participating in sprint planning, daily stand-ups, and retrospectives to implement technology-enabled solutions.
- Analyze financial, operational, and regulatory risks; develop mitigation strategies, ensure compliance.
- Identify and address inefficiencies in banking processes, focusing on operational efficiency and client service improvement.
- Optimize the bank's financial health through financial analysis and data-driven recommendations.
- Conduct market research and competitive analysis to inform market entry and expansion strategies.
- Collaborate with product teams to design and launch customer-centric financial products and services.
- Build and maintain strong client relationships, providing expert advice to address financial challenges.
- Stay abreast of banking regulations, ensuring operational and product compliance.
- Lead the development and execution of systems integration projects and roadmaps, aligning technology solutions with business goals.
- Facilitate stakeholder communication, ensuring clear and effective collaboration between business and technical teams.
- Generate new business opportunities by developing innovative ideas and solutions for clients.
- Deliver client engagements by collaborating with cross-functional teams to implement technology-enabled transformations.
- Assess and recommend technology solutions to enhance digital capabilities.
- Mentor and train junior consultants, providing leadership on complex projects and initiatives.

Deputy Manager

Axis Bank

(Sept 2019 - Dec 2020)

- Recommend and design optimized business processes, ensuring alignment with the bank's technology strategy.
- Analyze and interpret financial and customer data to support decision-making and strategy development.
- Collaborate with IT teams to design feasible, cost-effective solutions aligned with business requirements.
- Create detailed documentation of business requirements, process maps, and use cases throughout the project lifecycle.
- Act as a liaison between business units and IT teams, ensuring clear communication and understanding of requirements.
- Manage and cultivate relationships with stakeholders, ensuring their needs are addressed.
- Define test cases and actively participate in user acceptance testing (UAT) to ensure solution compliance.
- Identify and address system issues or defects and assist in planning and implementing changes to business processes and systems.
- Develop and deliver training and communication materials to facilitate change adoption.
- Stay current with banking regulations, ensuring proposed solutions adhere to regulatory guidelines.
- Identify and assess potential risks associated with changes or projects and develop mitigation strategies.
- Monitor implemented solutions, track key performance indicators (KPIs), and generate reports for management insights.
- Proactively seek opportunities for ongoing improvement in business processes and systems.
- Recommend and implement enhancements to drive efficiency and competitiveness.
- Assist in project planning and management, including defining project scope, objectives, and timelines.
- Contribute to agile project delivery, driving iterative development and continuous improvement.
- Work in ambiguous, fast-paced environments while adapting to changing project priorities.

Application Management Service Delivery

DXC Technology (former Hewlett-Packard Enterprise)

(March 2018 - Aug 2019)

- Monitor critical banking applications for optimal performance and adherence to SLAs.
- Swiftly respond to incidents, troubleshoot issues, and coordinate resolutions with stakeholders.
- Analyze recurring problems, determine root causes, and implement long-term solutions for prevention.
- Plan and manage application changes, updates, and enhancements, ensuring minimal disruption.
- Coordinate smooth releases of new versions or features, minimizing impact on end-users.
- Monitor resource utilization, plan for future capacity needs, and collaborate with vendors for support.
- Define, track, and report on service levels and KPIs for application availability and reliability.
- Maintain comprehensive documentation for troubleshooting and knowledge sharing.
- Identify and implement improvements for application performance, security, and user experience.
- Collaborate with cross-functional teams to identify and implement strategic technology solutions in financial services.

Software Developer

Saggezza India Pvt. Ltd.

(June 2015 - May 2018)

- Design, code, and maintain banking software adhering to best practices and standards.
- Collaborate with stakeholders to ensure applications align with business goals.
- Integrate banking systems for seamless data flow and interoperability.
- Implement security measures for data protection and regulatory compliance.
- Conduct thorough testing to ensure software reliability and address defects.
- Optimize application performance and scalability, especially during peak demand.
- Maintain comprehensive documentation for troubleshooting and knowledge transfer.
- Utilize version control systems for effective collaboration and code management.
- Work closely with cross-functional teams to deliver high-quality software solutions.
- Stay current with the latest technologies and continuously improve skills for enhanced efficiency.

PROJECTS

- LIBOR/IBOR to RFR Compliance Modernization
Engineered a product for seamless corporate loan system migration from LIBOR/IBOR to RFR, aligning with industry standards and regulatory requirements.
- Merger and Acquisition
Developed a solution to support the seamless amalgamation of public sector banks Bank of Baroda, Dena Bank, and Vijaya Bank, unifying operational workflows and ensuring continuity across core systems.
- TDS Deduction and Remittance to RBI
Implementation of TDS deduction under Section 194N and remittance to RBI, integrating with core banking systems to ensure compliance, reduce manual work, and enhance operational efficiency.
- Multi-Threaded Transaction Charge Utility
Build a multi-threaded utility to recover monthly transaction charges for over 1 million accounts, reducing batch processing time from 10 hours to 4 hours and improving core banking system performance by 60%.
- BASE24 Analytics and Transaction Monitoring
Implemented a real-time analytics tool for monitoring ATM/POS, etc. transactions through the BASE24 Tandem Server, enabling early identification of transaction failures that caused business losses, financial penalties, and system downtime by 30%, enhancing operational control and reliability.
- Wealth Management System
Worked on an Angular-based application with Spring Boot microservices for a bank's Wealth Management Systems, ensuring a responsive user experience.
- CBC-FRMS Real-Time Validation API
Developed a critical API between CBC and FRMS for real-time transaction validation, fortifying security, and mitigating fraud risks.
- Real-Time Data Integration API for UNISER Systems
Developed an API for real-time data exchange between UNISER and core databases, ensuring consistent and reliable data flow across banking systems.
- Automated Financial Reporting & Compliance Solution
Built an automated tool for daily financial reporting, improving accuracy and reducing manual effort by 90% in compliance-related processes.
